01 / ORIGIN

DEEPNDANCE IS BORN HERE AND NOW.

September 9, 2026.

DEEPNDANCE is a new vision of electronic music conceived by Noah Fex in 2026.

It begins at the intersection of two forces:

DEPTH + DANCE

Depth is emotion, atmosphere, space - what remains inside you after the sound disappears.

Dance is movement, energy, rhythm - the physical connection between sound and the human body.

DEEPNDANCE brings these two worlds together, but it is not defined simply by combining existing genres.

It is not Deep House. It is not Dance music as we already know it. It may contain elements of House, Techno, Trance, Progressive, cinematic music, experimental electronic music and sounds that do not yet belong to any category.

DEEPNDANCE can touch all of them, but it belongs completely to none of them.

02 / THE SOUND

DEPTH YOU CAN FEEL. MOVEMENT YOU CANNOT IGNORE.

DEEPNDANCE is built around powerful low frequencies, hypnotic movement, emotional atmosphere and unexpected sonic events.

The bass should be felt as much as heard. The rhythm should create movement without becoming predictable. Melodies can be minimal, emotional, strange, beautiful, dark or euphoric.

Silence can be part of the rhythm. Noise can become music. A human voice can become an instrument. A sound recorded in the real world can become percussion, atmosphere, melody - or something that has never existed before.

Nothing is forbidden simply because it is unusual.

03 / THE UNEXPECTED

BREAK EXPECTATION.

Surprise is part of the identity of DEEPNDANCE. Every track should contain something capable of breaking expectation.

A strange texture. An impossible sound. A sudden space. A rhythm that changes direction. A frequency that appears for only a moment. An unfamiliar instrument. A transformed human sound.

A detail that makes the listener think:

"WHAT WAS THAT?"

DEEPNDANCE should not exist to reproduce formulas. It should create them.

04 / THE EXPERIENCE

THE BODY AND THE MIND.

DEEPNDANCE is designed to work on two levels at the same time: the body and the mind.

It should have enough energy to move a dancefloor and enough depth to be experienced alone with headphones.

It can be beautiful. It can be aggressive. It can be mysterious. It can be emotional. It can be overwhelming.

But it should never be indifferent.

05 / THE PHILOSOPHY

FOUR PRINCIPLES

**GO DEEP.
CREATE MOVEMENT.
BREAK EXPECTATION.
MAKE PEOPLE FEEL SOMETHING.**

NOT A FORMULA. A DIRECTION.

DEEPNDANCE has no rigid formula. Technology will evolve. Production techniques will evolve. Artists will interpret the sound differently.

Analog instruments, digital synthesis, field recordings, human voices, artificial sounds, acoustic objects, noise and future production techniques can all coexist.

Anything can become part of the music if it creates emotion and movement.

DEEPNDANCE should evolve with the people who create it, because it is not meant to describe what electronic music already is.

It exists to explore:

"WHAT CAN ELECTRONIC MUSIC BECOME NEXT?"

THIS IS THE BEGINNING.

The sound will evolve. Other artists may interpret it differently. New ideas will change it. That is part of its identity.

DEEPNDANCE is not meant to be frozen in time. It is meant to evolve.
